

HELPING PARENTS OF CHILDREN WITH NEUROLOGICAL DISORDERS

The
Family
Hope
Center

AN INTERNATIONAL CENTER FOR
THE DEVELOPMENT OF CHILDREN

HOW IT WORKS

THE FAMILY HOPE CENTER PARENT TRAINING CONFERENCE is a globally renowned event that provides parents and professionals working with individuals with special needs with a robust toolkit to significantly improve their development. Guided by the center's clinical team, the three-day conference will teach you how to understand the root cause of your child's neurological challenges and learn practical evidence-based practices to implement at home.

We partner with parents and professionals whose children represent an array of neurologically based issues:

- ADD/ADHD
- Autism
- Behavioral disorders
- Cerebral palsy
- Developmental delays
- Genetic disorders including (Down Syndrome).
- Learning disabilities (dyslexia)
- Seizure disorders (epilepsy)
- TBI

THE CONFERENCE TOPICS WILL COVER:

- Learning how the brain develops over time, how it grows in response to its environment and the processes by which it heals.
- Evaluating neurological function and developmental ability by learning the Family Hope Center assessment tool used to evaluate an individual's abilities across 5 brain areas and 7 areas of development.
- Instruct you the parent, how to use the assessment tool as a source for establishing a therapy plan to help your child's neurological development and teach you how to consistently apply the evaluation tool to monitor progress and respond with the appropriate therapy.
- Promoting Neurogenesis: Parents are taught lifestyle changes, strategies, and practices to implement at home to promote brain development and thereby improve the functional abilities of their children.
- How the family can thrive through the challenges of supporting a child with special needs

SOUTH AFRICA 2020 PARENT TRAINING CONFERENCE - FEBRUARY 21, 22, 23RD 2020
